Description: **SIGLA** is a thin steel sheet (0.50-0.60 mm), profiled to obtain the shape of tiles, hot dipped galvanized and pre-painted. The material guarantees a high quality, durability, weather resistance, and UV rays resistance.

Option:

- hot dipped galvanized steel
- copper

- backcoat epoxy painting
- Zn (150 g/m²)
- steel sheet
- Zn (150 g/m²)
- primer polyester painting
- topcoat polyester painting
- stretch film

Advantages:

- Double water ditch
- Customized length of the sheets
- Customized color according to RAL catalogue
- Easy and fast assembling

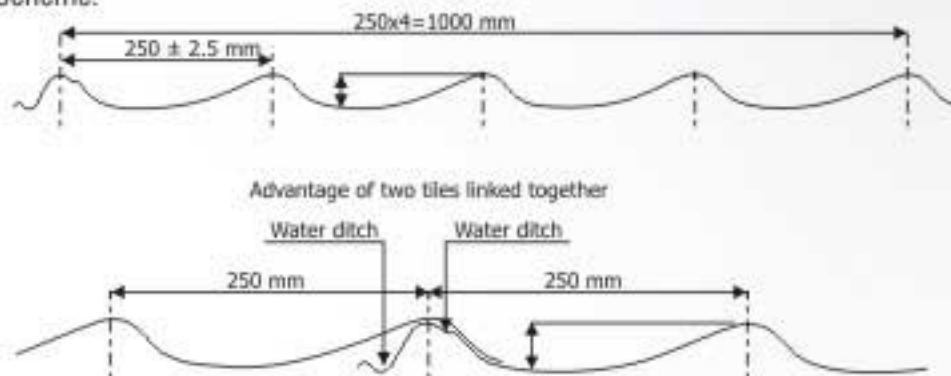

Application:

SIGLA roof tiles offer customized solutions either to new buildings or to the renovation of old ones. **SIGLA** is applicable to housing construction, industrial construction as well as to public building.

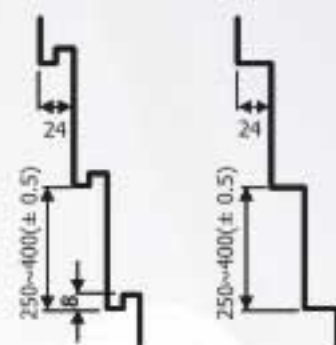

Scheme:

S1 three dimensional

S2 traditional
